welcome to  
saloni

In the memory of our dear Ahmet Yasar...

Born in Afyon in the year 1944, Ahmet Yasar captured the hearts with his achievements in the textile sector. Yasar started his trade life with Milangaz Dealership, and he was also engaged in the furniture sector. When he came to Bursa in 1984, he became a "pioneer" and succeeded in presenting many new types of fabric to the city. He was a businessman who worked his way up in the sector with his ideas...

A famous textile supplier, an excellent businessman, a unique father, the Chairman of the Board of Yaşarlar Corporate Group and a member of Bursaspor Council Board; our dear Ahmet Yasar sadly passed away at the age of 74.

In the light of the sincerity we have established and the experiences we have gained, this catalogue is dedicated to him.

We thank our Uncle Ahmet Yasar a million times for his valuable ideas and efforts he put into the sector and Saloni, and we remember him with respect and longing.

"The first thing you need to do  
is to be a good person..."

Ahmet YASAR

# 20 years with pride

Our Esteemed Customers and Valuable Business Partners,

We are happy to say hello to you with our catalog containing our new product collection. This year is a special year for us. We celebrate the 20th anniversary of our partnership together.

I would like to present our new investments and developments related to our company while sharing our very exciting new products which are special in honor of our 20th year. First of all, we have made great strides in our goal of producing robust, aesthetic, and comfortable products that meet the expected quality level all over the world. By increasing our material and workmanship quality, even more, we are progressing with full speed to reach excellence in the way of maximizing customer satisfaction.

We have a strong franchising organization with over 70 branches in Turkey and 40 in all over the world. Especially with our breakthrough in the field of exports, we are exporting 70% of our products to the whole world, mostly Europe.

We crowned this breakthrough in quality and sales by strengthening our production infrastructure. Our new investments; bedrooms, dining rooms, and bedsteads were put into operation at full capacity. Together with our metal factory and sofa production factory, we are in an effort to offer you the best products with a total of 400 employees in 5 factories.

Along with our bedroom models, in order to offer you the best options for bedding, we have established strategic cooperation with the Altın Yatak bedding company, which has a deep-rooted history and strong production infrastructure. You will be able to easily access Altın Yatak bedding products from our stores.

Since 2000 when we founded Saloni; We are proud to work with our full power to serve you with our stronger production infrastructure, without sacrificing our values, to maintain a moral and trust-based trade with our customers, to produce quality and functional products, to provide a peaceful and pleasant working environment for their employees.

Best regards,

**Haluk OZBEK**  
Saloni Furniture – CEO

# Saloni Europe

Our Esteemed Customers and Valuable business partners;

In this period when we celebrate the 20th anniversary of our beginning, we are happy to present our new collection catalog. It also excites us to aspire to our valued customers, who are at the center of the source of this happiness.

As Saloni, we accepted it as the basic value to offer our consumers the most robust, comfortable, and aesthetic products, and to continue to this end, from the very first day we aim for the best. We wholeheartedly thank all of our colleagues and followers who dreamed, designed, exerted, and produced in our new collection, which we presented to you in line with this goal and purpose.

We aimed to make our products much more optional and useful in this collection, where we work with the responsibility given to us by our “being consumer-friendly” value, which is one of the basic values of Saloni. We tried to present to you the imagined living spaces with the right colors, styles, and designs. Of course, there is no limit to dreams, as our dreams have no limits, we have infinite energy to do better, design, and produce better. We continue to work on new projects in order to make Saloni a more preferred and faster brand in every field with the awareness that the success equivalent to labor cannot be achieved only with a good collection.

In this context, we create a sales and storage center in Germany in order to achieve higher success in European countries, to better identify European furniture habits. Our sales and storage center, which we started six months ago and will start operating at the end of 2020, will be able to deliver to all of Europe within 24 to 72 hours. In addition to this, we will be able to present a significant part of our products in our collection to our liking in a corporate store environment with the exemplary corporate stores we have created in Germany.

We know that in order to create livable houses, it is necessary to analyze the consumer's expectations well. Presenting every correct analysis and product with the right concept is the main success criterion for furniture sales. Because we see the products that are the subject of the dream and offered to the taste of the consumers as a work created by the furniture artist with effort. In addition to the beauty of the work, we find it very important that it is designed with so much care in the space that covers it.

With the Saloni European structuring; In addition to providing products to its dealers faster, it will show that Saloni is closer to its dealers than before, and will continue to offer the best service to its dealers by taking inspiration from Europe's design power and innovation success.

Best regards,

**Ismail OZBEK**  
General Manager Saloni EU

Here we can see Abdullah CANSEVEN. Beginning his carrier at the age of 23 in Saloni Furniture following his education in Industrial Product Design, he acts as the team leader for the design, internal architecture, and R&D departments. While contributing creative touches to the new collections, CANSEVEN and his team always reach for the undiscovered.

An orchestra where artists who know the notes and specialize in different instruments come together.

I'm talking about an orchestra of artists that know the "musical notes", yet each specializing in a different instrument. Yes, I believe this is one of my greatest mottoes: we aim to introduce new instruments to our team every day. In order to be able to create artworks that can be considered worldwide classics, we tirelessly work and enjoy the feast at the same time.

For me, to be able to design is the capability to discover what already exists, so a designer should also be a good explorer. One should look at this with a philosopher's perspective, and in fact become a philosopher, and should reach the point where one can present his/her own philosophy. We have witnessed during the history, and in fact, still witnessing, how the designers that see each of their pieces as steps to prove their own philosophy have produced authentic results.

The two elements that I care most in a design: "Balance and Harmony". Not only have numerous sub-contexts existed under this balance, but also more sub-contexts under these as well. Without an alternative, the place where balance and harmony present itself is the "Nature". As Fernando Caruncho states: "the human mind, stronger than many other powers, is the most advanced computer". We have to connect with nature, which is far stronger than humans, and we have to nourish our minds with it. When the human

mind is experiencing nature, all 5 senses are active. When we observe it, feel it, and try to recognize its power, we are able to understand more than any other technology can provide. The technology, which can never reach the power of nature, can only be an instrument in understanding it. When you trust all your mind and senses to a greater power, an artwork emerges.

Amongst the designers who I believe had analyzed these two important elements, Jean Marie Massaud and Maurizio Manzoni are in the lead for me.

We can see that particular sets of skills are valued more in various places in the world. In Italy, it's the design, while in Germany, it's the engineering. In Greece, it's philosophy, while in Japan, it's efficiency, and in Korea, it's technology. The world is large, and there are people who do their job justly. A designer should embrace these skill sets and should make use of all the resources available to him/her. A designer should hold the world in his/her palm, and fight to realize the dreams in an incredibly free and authentic manner. A designer should also preemptively accept that the truth of yesterday might not be the truth of today, and future. Not content with this information, a designer should also aspire to create the truth of tomorrow.

# Saloni International Quality Certification Program

Saloni brand products have been certified based on EN 12520 European Standard that was prepared by European Technical Committee on Standardization (CEN)

Our products were tested based on:

- Production system
- Product strength and durability
- Product and material safety
- Long lasting and sturdiness

criteria and successfully fulfilled the necessary conditions and CEN/EN 12520 certified.

## Certified Quality...

We have always kept our sensitivity for quality and durability at the top level in Saloni products for 20 years. The first thing that comes to mind when it comes to Saloni has always been durability, security and ergonomics. It is indispensable for us to offer aesthetics and comfort to our customers with these features.

The durability and safety of our products have been certified with an international certificate. We have been entitled to receive EN 12520 certificate after our production system and products were audited.

EN 12520 European Standard is a standard covering the requirements for the strength, durability and safety of seating elements used by adults in homes. This standard has been prepared by the European Technical Committee on Standardization (CEN) Furniture Technical Committee, and has been

approved by CEN and entered into force. This standard covers the points related to the safety of the user in the seats, armchairs and other seating elements used at home and the specifications to guarantee the durability of the product. In order to obtain this document, our production site inspection and a quality management system inspection carried out primarily. After this preliminary examination is passed, the sample products are subjected to the tests specified in the standard. Products that provide strength, durability and safety conditions passed the tests successfully and are entitled to receive this certificate.

We have passed an important milestone in our quality journey by registering our system with first with our ISO 9001 Quality Management System Certificate and finally with our EN 12520 Certificate. This is not a destination, because we believe that, quality is a journey, not a destination...

# A work of mathematics!

**The world of imagination has no boundaries. What matters in the furniture sector is the applicability of the imagined lines. Customer experiences, production, and the resulting designs... Are like pieces of an incomparable jigsaw puzzle. And the pieces should be able to solve an equation.**

Education received during construction of the skeletal system of furniture, and the realism of the products that were prototyped, are what guide the design processes. 3D modeling software lets us receive feedback faster and even lets us how a piece of seating group can be moved through a doorway.

| LIGHT WALNUT | MATT ANTRACITE | MATT WHITE | BRIGHT WHITE | WALNUT | MATT ECRU | SMOKED OAK | CREAM | CRIMSON FUME | MATT BLACK | BRIGHT BLACK | GRAY |

*Short, Long, Big, Small...*  
Catch the harmony in details.

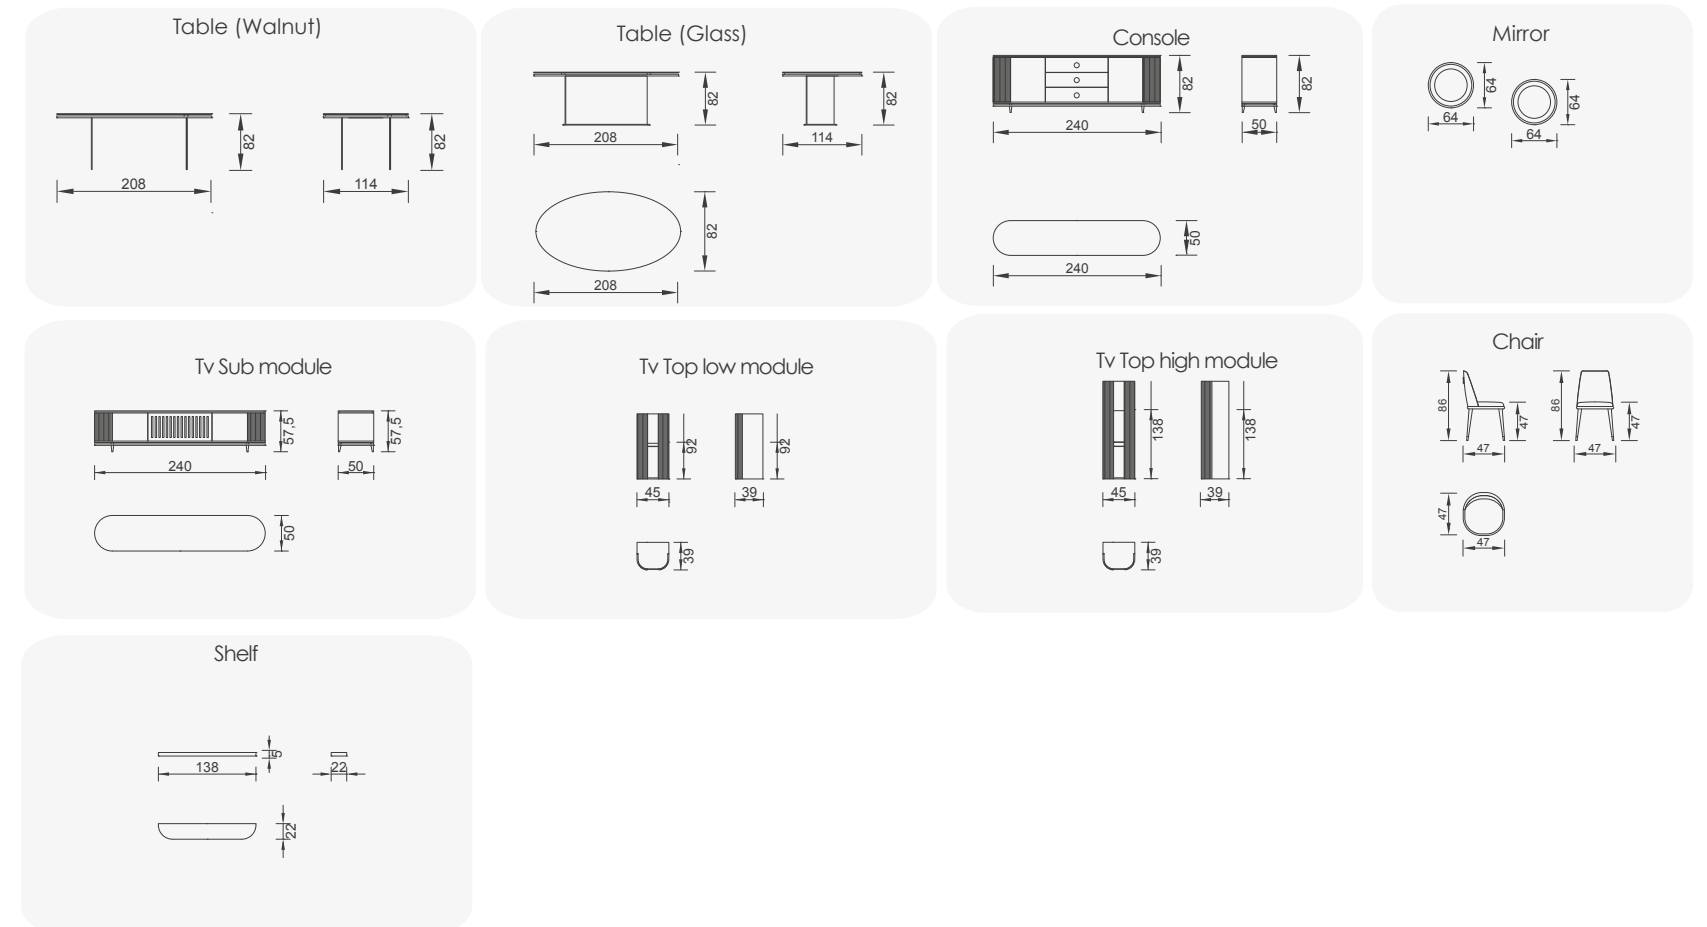

# COCO

# Coco (walnut)

*Start a New Story with Majestic Locations!*  
 Marble Look and Warm Tone of Walnut Together!

*A Combination of  
Pleasure & Comfort*

*Modular structure's  
traces in design support  
the powerful look.*

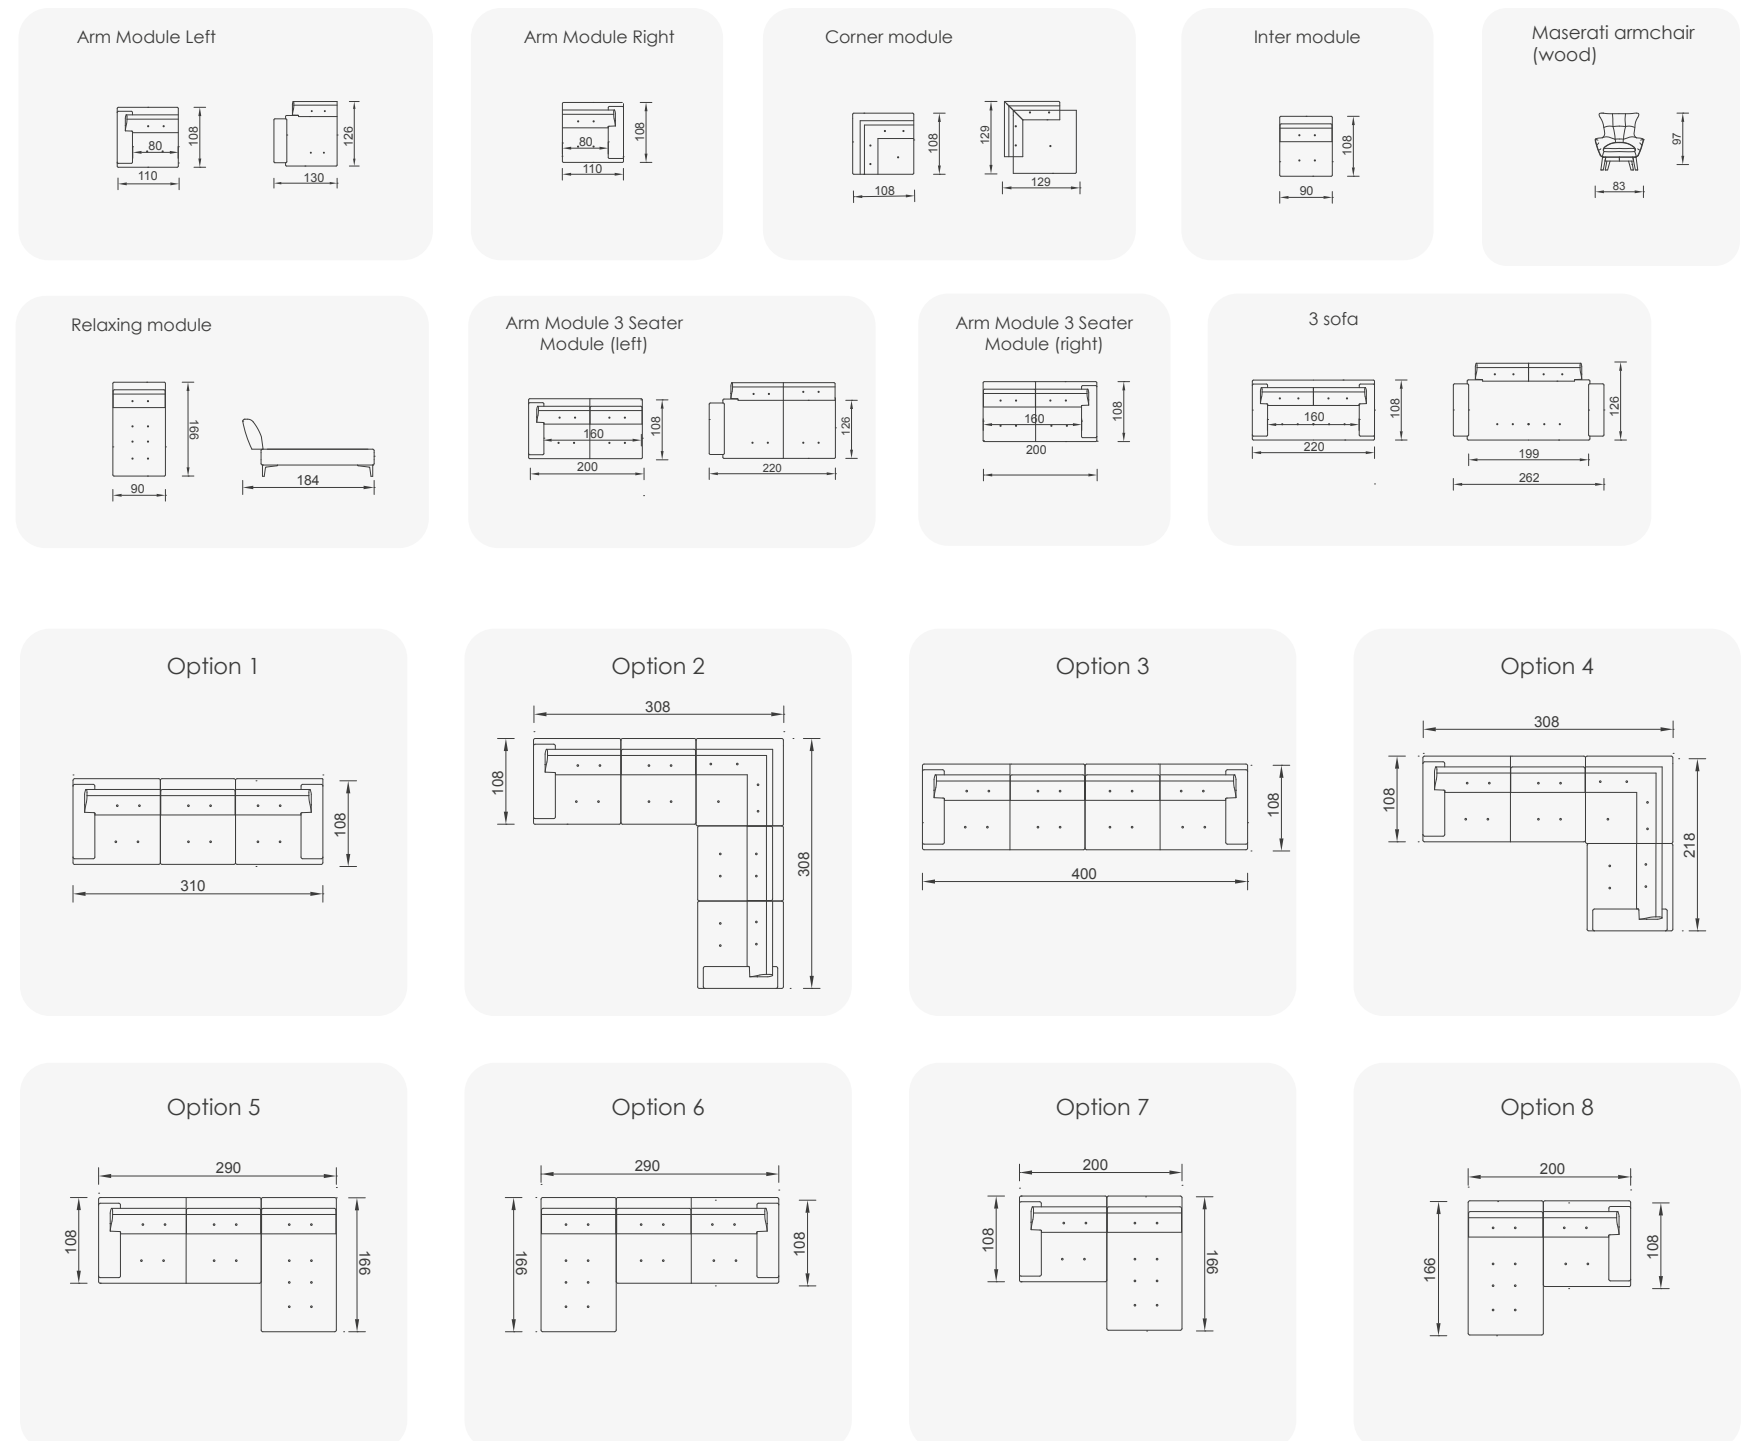

# Prada

- 35 density high-resilient seat foam
- Frame strengthened with ply-wood (10 year warranty compliance with European norms)
- Modular structure provides unlimited options

Wooden Based Finish

### *Power From Leather*

Patterns, leather fabrics, soft details ... Aspendos turns the oriental design concept into a modern look.

*The authentic rendering of an unusual production.*

# Aspendos

- 35 density high-resilient seat foam
- Frame strengthened with ply-wood (10 year warranty compliance with European norms)

Wooden Based Finish

3 sofa

2 sofa

Bond armchair (without capitone)

Bağdat Coffe Table

Vega Coffe Table

Felix armchair (wood)

Lord armchair

*Designs That Create Their Own Balances*

With the gathering of different decoration cultures, a new trend can be captured outside the styles.

# Conrad

- 35 density high-resilient seat foam
- Frame strengthened with ply-wood (10 year warranty compliance with European norms)
- Modular structure provides unlimited options

chelsea

# Porto

- 35 density high-resilient seat foam
- Frame strengthened with ply-wood (10 year warranty compliance with European norms)
- Modular structure provides unlimited options

## Wooden Based Finish

*Stunning*

Functional modular products add mobility to the decoration.

*The point of renewal.*  
As bald as it looks: Pera

# Pera

- Feather sponge on the back
- Frame strengthened with ply-wood (10 year warranty compliance with European norms)
- Modular structure provides unlimited options

Legs Finish
